Sir:

PRELIMINARY AMENDMENT

In the above-entitled patent application, please amend the application as follows:

In the Claims

- a' SUB B6 1. (amended) A driver circuit, having at least one input node for an input signal and
2 at least one output node for an output signal, having one or more, preferably two, sub-drivers and
3 having a feedback circuit, which has one or more evaluation circuits and one or more feedback
4 capacitors, the evaluation circuit(s) being connected to the sub-driver(s) and the feedback
5 capacitor(s) respectively being provided between an output node of the driver circuit and an
6 input node of an evaluation circuit, the at least one evaluation circuit having a first inverter stage,
7 coupled to the input node of the evaluation circuit, and also a second inverter stage, connected in
8 series with the first inverter stage, the first inverter stage being short-circuited with the input
9 node.
